25X1C Rostock	small shipments of mixed cargo	-	-
Jueterbog	" "	-	- 3

25X1A 1. [redacted] Comment. Spare parts deliveries from the USSR. The volume of this traffic in July differed only by 2.5 percent as compared with pertinent figures obtained from reports on rail border crossing stations. Comparable figures for August are not yet available. The heavy decrease in the volume of spare part shipments from the USSR in August is noteworthy.

Approved For Release 2002/07/22 : CIA-RDP80-00810A002600640001-2

25X1A [redacted] 25X1A

25X1A 2. [redacted] Comment. The volume of incoming shipments was on about the same level as during the preceding months. About 50 percent of the spare parts delivered were manufactured in East Germany. The other shipments are return shipments of defective parts from army and division tank repair shops. They amounted to 114 carloads each in July and August.

25X1A 3. [redacted] Comment. The volume of outgoing shipments reached its peak in April and May and is now again normal. [redacted] 25X1A
